

# Empty carts? Help is at hand

**CabiNet helps improve the supply of scrubs and uniforms to authorized users - provided they return what they take.**

All garments are fitted with washable RFID chips that are scanned by our own readers.

There's no touchscreen to bother with – just swipe your ID card and slide open the door for the size you want!

## How does it work?

- ✓ CabiNet identifies authorized users and only grants them access
- ✓ It encourages users to return what they have taken or lose future access
- ✓ It ensures a reliable supply by sending alerts to operators when a size runs low

We call it **Access with Accountability**. And being affordable, CabiNet can be located closer to where users work.

## CabiNet

The scrub and uniform dispenser trusted by laundries worldwide

## We help you look good

With **100's of units in service**, CabiNet can issue almost anything and can be installed almost anywhere – check out our formats.

### CabiNet Dispenser

Holds around 400 scrub pieces (tops and pants) on adjustable shelves.

A card swipe unlocks sliding doors with the contents scanned after each transaction.

4ft wide x 2ft deep  
(120 x 60cm)

### Cubby Dispenser

Holds around 200 scrub pieces (tops and pants) on adjustable shelves.

A card swipe unlocks hinged doors with the contents scanned after each transaction.

2ft wide x 2ft deep  
(63 x 60cm)

### CabiNet Receiver

For the return of soiled scrubs – users just push garments through the opening. Each item is automatically scanned.

4ft wide x 2ft deep  
(120 x 60cm)

### CabiNet Combi

A combined Dispenser and Receiver in one unit. Holds around 200 scrub pieces (tops and pants).

4ft wide x 2ft deep  
(120 x 60cm)

## Fast deployment

CabiNet is delivered fully-assembled and plug-and-play.

You fit the shelves to suit the sizes to be stocked, load it with inventory and it's ready to use!

The system is managed by **Dresscode**, CabiNet's cloud application that allows your customers to add and delete users, view stocks and monitor usage.

## Technology

CabiNet was developed by Autovalet and is now an independent company.

Building on over 20 years experience with RFID, each CabiNet unit is fitted with our own reader operating with the latest Impinj E710 reader chip.

Reader settings and status can be viewed and adjusted at any time through Dresscode.

## Get in touch

CabiNet is sold and supported by our network of partners worldwide.
